ISMSEM 2022

1st International Seminar on Materials Synthesis and Environmental Monitoring

« Issues and Perspectives »

SCIENTIFIC DEVELOPMENT

ISMSEM 2022 has teamed up with the Special Journal Issue on Materials & Biomaterials Science (ISSN 2061-7226). A number of selected full text papers will also be considered for the special journal issue. All submitted papers will have the opportunity to be considered for this Special Journal Issue.

AIMS AND OBJECTIVES

The first international seminar on materials synthesis and environmental monitoring aims to bring together leading academic scientists, researchers and research scholars to exchange and share their experiences and research results on all aspects of Materials Synthesis, Characterization and Processing. It also provides a premier interdisciplinary platform for researchers, practitioners and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted in the fields of Materials Synthesis, Characterization and Processing.

The conference provides an opportunity for scientists and engineers to showcase their research on an international platform. It also provides a venue for entrepreneurs and venture capitalists to discuss collaborative research and business developments. A panel of international experts will discuss and address possible avenues to bridge the gap between research and development. Conference attendees will receive a copy of the proceedings that contains all accepted papers.

This conference will include, emerging research related to materials, nanotechnology, environment and other interesting topics

ABOUT THE SEMINAR

The first international seminar on materials synthesis and environmental monitoring (ISMSEM 2022), organized by department of chemical process engineering, faculty of applied sciences, university of Kasdi-Merbah, will be held in Ouargla (Algeria), from 07th to 09th February, 2022.

The first edition of (ISMSEM 2022) provides an update on the latest advances in technology and applications of synthesized nanostructures and nanomaterials.
